# Adopt AI and prove Zero Trust, without slowing the business.

Greymatter.io turns Zero Trust from a project into a posture you can measure and report. It puts AI traffic under the same controls as the rest of your services.

The Stoplight scores twelve controls live.

COMPLIANCE

## Answer the board with evidence.

Twelve controls, scored live against DoD Zero Trust, CISA ZTMM, GDPR, and more. Export the evidence behind each one.

AI ADOPTION

## Say yes to AI, safely.

AI Guardrails covers the OWASP LLM Top 10, data loss prevention, and MCP at every enforcement point. See what would be blocked before you enforce.

SPEED

## Onboard teams in hours, by policy.

Enroll a namespace, and its workloads join with nothing for the team to apply. Offboarding is just as clean.

FUTURE-PROOF

## Ready for the next mandate.

FIPS 140-3 validated (CMVP #5191) and post-quantum encryption are on by default. Each change to the platform is signed, recorded, and open as a diff.

BY THE NUMBERS

**12** Zero Trust controls scored live

**5** frameworks measured, pillar by pillar

**30 days** of forensic records for each request

NEXT STEP

## Questions, demos, and lab access
